DETAILED ACTION

The indication of allowability of claim 22 and the claims dependent thereon as set forth in the previous action is withdrawn in view of the following new ground of rejection.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 22-23 and 27 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Gerlich et al (2002/0032350).

Gerlich is deemed to anticipate or renders obvious the “method for recovering acetone from a waste stream from an acetone purification stage, wherein said waste stream comprises mesityl oxide, said method comprising:

i) separating said waste stream in a separating device into at least a first stream comprising mesityl oxide;

Art Unit: 1764

ii) concentrating said mesityl oxide, thereby producing concentrated mesityl oxide stream;

iii) recycling said concentrated mesityl oxide stream into said separating device;and

iv) bringing said concentrated mesityl oxide stream into contact with a basic or acidic aqueous medium, or with an acidic catalyst in the presence of water, whereby mesityl

oxide is at least partially hydrolyzed to acetone, said method further comprising

obtaining said waste stream from the acetone purification stage by: obtaining crude

acetone by a Hock process; separating said crude acetone in a purification column by:

removing purified acetone as a head stream and removing the waste stream as a

bottom stream” as claimed in claim 22. See also claims 23 and 27 of Gerlich’s entire

disclosure.

Claims 2-3, 5-8, 10-21 and 24-26 are allowed.
